**DETAILED ACTION*****Election/Restrictions***

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-5, drawn to a process for conserving an anti-oxidant, classified in class 426, subclass 541.
- II. Claims 6-19, drawn to an additive for food, a binder syrup and a method of making a binder syrup, classified in class 426, subclass 658.
- III. Claims 11-19, drawn to a process for preparing a dry ready to eat food and a granola bar, classified in class 426, subclass 660.
- IV. Claims 20-26, drawn to a process for preparing chocolate, classified in class 426, subclass 631.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 10/672,232  
Art Unit: 1761

Page 3

Inventions I-IV are directed to related to processes and products that contain cocoa solids. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, Group I is directed to a process for conserving and antioxidant, not mentioned in any of the other groups. Group II is related to a binder syrup and ingredients to make a binder syrup that are not mentioned in Groups III-IV. Group III is directed to the preparation of a dry food and a granola bar that utilizes different components than any of the other groups, such as like flour, grain and cereal. Group IV is directed to a product and process for making chocolate.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even

Application/Control Number: 10/672,232  
Art Unit: 1761

Page 4

though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.
